

# ENROLL US!

We Want to Be a Partner in EPA's  
National Partnership for Environmental Priorities

## IDENTIFYING INFORMATION

Organization: Precoat Metals division Sequa Coatings Corporation  
Principal Contact: Robert L. Mead  
Authorizing Official: \_\_\_\_\_  
Address: 3500 Walnut Street  
Phone/Fax: (708) 354-5180, ext. 3142 / (708) 354-5194  
EPA RCRA ID Number: PAD006266324

Facility Name: McKeesport Plant  
Title: Director, Environmental Affairs  
Title: \_\_\_\_\_  
City/State/Zip: McKeesport, PA 15132  
Email: rmead@precoat.com  
Date: 8/08/05

## PARTNER AGREEMENT

Our organization is choosing to become a partner in EPA's National Partnership for Environmental Priorities. Our goal is to reduce the quantity of one or more Priority Chemicals currently found in our products, processes, or releases using techniques such as source reduction, recycling, or other materials management practices. In this enrollment application, we identify one or more voluntary goals that we believe we can achieve as partners in this program. The voluntary goal(s) provided below is an initial estimate and may change over time. We may revise our goal(s) or withdraw from the program at any time. If/when we choose to revise our goals or withdraw from the program, we will notify EPA.

**GOAL #1. Chemical Name:** Naphthalene **CASRN:** 91-20-3

Narrative description of proposed project: \_\_\_\_\_  
Precoat Metals applies decorative organic coatings to metal coils for various end uses. The organic coatings are formulated with solvents that naturally contain naphthalene. Precoat Metals will ask its paint suppliers to evaluate the reformulation of its coatings with "naphthalene depleted" solvents.

How we will measure success: The plant enters into a computer the weight percent of all hazardous materials on the MSDS for each paint used. An annual report is generated that computes the pounds of each hazardous material used. The metric used to normalize the pounds of chemical will be gallons of paint used.

1a. Our voluntary **source reduction** goal for Chemical #1 is to reduce the amount of this chemical generated/used from a baseline amount of 20,000 pounds in September, 2005 (month/year) to a reduced amount of 18,000 pounds generated/used by December, 2006 (month/year).

1b. To accomplish this goal, we will use the following source reduction options (check all that apply):

<input type="checkbox"/> Equipment or technology modifications.	<input type="checkbox"/> Process or procedure modifications.
<input checked="" type="checkbox"/> Reformulation or redesign of products.	<input type="checkbox"/> Substitution of less toxic raw materials.
<input type="checkbox"/> Improvements in inventory control.	<input type="checkbox"/> Improvements in maintenance/housekeeping practices.
<input type="checkbox"/> Other (describe): _____	

2a. In addition to, or in lieu of using source reduction methods, our voluntary **recycling or recovery** goal for Chemical # 1 is to increase the recycled or recovered quantity of this chemical from a baseline amount of \_\_\_\_\_ pounds in \_\_\_\_\_ (month/year) to an increased quantity of \_\_\_\_\_ pounds by \_\_\_\_\_ (month/year).

2b. To accomplish this recycling or recovery goal, we will use the following options (check all that apply):

<input type="checkbox"/> Direct use/reuse in a process to make a product.
<input type="checkbox"/> Processing the waste to recover or regenerate a usable product.
<input type="checkbox"/> Using/reusing waste as a substitute for a commercial product.
<input type="checkbox"/> Other (describe): _____
